

EDUCATION

| | | |
|---|-----------------|----------|
| Ph.D. Materials Science and Engineering , <i>University of Wisconsin-Madison</i> | (GPA: 3.70/4.0) | Aug 2024 |
| M.S. Materials Science and Engineering , <i>University of Wisconsin-Madison</i> | (GPA: 3.70/4.0) | Dec 2020 |
| B.S. Engineering , <i>Fort Lewis College</i> | (GPA: 3.99/4.0) | Dec 2017 |

SKILLS

| | |
|----------------------|---|
| Tools | Python, PyTorch, scikit-learn, Bash, Git, \LaTeX , C++, Verilog, MATLAB, OpenHPC, Vim, Docker, Apptainer, Linux, VASP, LAMMPS, AutoCAD, SolidWorks |
| Communication | English and Spanish (fluent written and verbal) |

TECHNICAL EXPERIENCE

Research Assistant Jun 2018 — Aug 2024
Computational Materials Group, UW-Madison Madison, WI

- **Machine Learning Domain of Applicability for Materials:** Developed a method using kernel density estimation to assess the applicability domain of machine learning models. The method effectively distinguishes chemically distinct groups and relates high dissimilarity with poor model performance and unreliable uncertainty estimates.
- **Scientific Cluster Construction and Administration:** Assisted in building and managing two high-performance computing clusters. Compiled materials research software and implemented Environment Modules to streamline software management.
- **Quantifying Metallic Glass Forming Ability:** Developed a high-throughput workflow for efficiently training machine learning interatomic potentials and simulating complex material properties. Properties were used to develop models for metallic glass forming ability and followed physically rational trends observed in previous research.

Summer Undergraduate Research Experience May 2017 — Aug 2017
Computational Nuclear Engineering Research Group, UW-Madison Madison, WI

- **Developed Python Tool:** Automated the visualization of Direct Accelerated Geometry Monte Carlo (DAGMC) geometries in VisIt.
- **Collaboration Friendly Code:** The Python PEP 8 coding style was adopted to facilitate easier reading.

Capstone Design Project Sep 2016 — Apr 2017
Undergraduate Research, Fort Lewis College Durango, CO

- **Built Instrumentation:** Team designed and built an exotic propulsion test stand.
- **MATLAB Modeling:** Implemented electrostatic displacement mechanism and modeled system response.

Summer Undergraduate Research Fellowship May 2016 — Aug 2016
Advanced Diagnostics and Propulsion Research Laboratory, Purdue Durango, CO

- **Experimental Imaging:** Operated pressure vessels, X-ray tube sources, and high-speed cameras for analysis of two dimensional sprays.
- **Lead Shielding:** Constructed a protective lead enclosure for X-ray tube sources to shield operating personnel from excessive radiation exposure.

Design Project Dec 2015 — Apr 2016
Undergraduate Research, Fort Lewis College Durango, CO

- **Sensor Package:** Designed and developed an interchangeable sensor package for measurement of water temperature, oxygen reduction potential, pH, time, and global positioning system data.

- **Simple Deployment:** Package designed to be durable, waterproof, and easy to use by attaching to rafts or kayaks.
